

# ND Probiotic Advanced

**ND Probiotic Advanced** contains 9 species of microorganisms from non-dairy sources. Because each strain has an affinity for a different part of the digestive tract, and a unique mechanism of action, a product that delivers multiple strains is preferable to single strain products.\*

**ND Probiotic Advanced** also contains added Fructooligosaccharides (FOS), a soluble fiber and prebiotic that selectively supports the proliferation of intestinal probiotics for digestive tract health.\*

#### ND Probiotic Advanced is:

- Guaranteed to contain 52.5 billion CFUs of microorganisms in each vegetarian capsule.
- A non-dairy multi probiotic product to best mimic normal human flora.\*

#### Recommended For:

- Individuals who are lactose intolerant\*
- Normalizing digestion\*
- Supporting regularity\*
- Urologic support\*
- Immune system support\*

#### About the Formula

- **Lactobacilli** (*L. acidophilus*, *L. rhamnosus*, *L. casei*, *L. salivarius*) are located in the small intestine and produce lactic acid. Many strains of bacteria from the *Lactobacillus* family have been shown to support regularity, urogenital and vaginal health, production of the lactase enzymes and protect the gut lining from unwanted materials.\*
- **L. salivarius** is a strain of beneficial bacterial that has been shown to resist low pH conditions. It has also been shown to support immune system function by modulating certain cytokines (IL-10 and IL-12).\* In vitro studies have shown that *L. Salivarius* strongly adheres to human epithelia cell lines. This interaction with the mucosa demonstrates its support of the intestinal immune system.\*

- **Bifidobacteria** (*B. lactis*, *B. breve*, *B. longum*, *B. bifidum*) are located in the colon and produce lactic and acetic acids, making the gut a very inhospitable place for unwanted materials. Bifidobacteria have been shown to promote regularity.\*
- **Streptococcus thermophilus** is also a lactic acid producer, which lines the gut wall to provide a barrier from unwanted materials, promotes regularity and produces the lactase enzyme.\*
- **Fructooligosaccharides** (FOS) are considered a soluble fiber and prebiotic, which supports the growth of beneficial microorganisms in the intestinal tract.\*

#### Supplement Facts

##### Serving Size: 1 Capsule

##### Amount Per Serving

Probiotic Bacteria Complex	52.5 Billion CFU
Containing: Bifidobacterium lactis, Lactobacillus acidophilus, Lactobacillus casei, Bifidobacterium breve, Lactobacillus salivarius, Streptococcus thermophilus, Bifidobacterium longum, Bifidobacterium bifidum, Lactobacillus rhamnosus	
Fructooligosaccharides (FOS)	25 mg

Other ingredients: vegetable cellulose (capsule), rice maltodextrin, vegetable stearate, silica.

**Warning:** If pregnant or nursing, consult your healthcare practitioner before taking this product.

**Suggested Use:** As a dietary supplement, take 1 capsule once or twice daily, between meals or as directed by your healthcare practitioner.
